SUPPLEMENTARY INFORMATION:

OSHRC's Settlement Part program, codified at 29 CFR 2200.120, is designed to encourage settlements on contested citations issued by the U.S. Department of Labor's Occupational Safety and Health Administration (OSHA) and to reduce litigation costs. The program requires employers who receive job safety or health citations that include proposed penalties of \$100,000 or more in total to participate in formal settlement talks presided over by an OSHRC Administrative Law Judge. If settlement efforts fail, the case would continue under OSHRC's conventional proceedings, usually before a judge other than the one who presided over the settlement proceedings.

To ensure the continued success of the program, OSHRC proposes to collect information from Settlement Part participants about their experiences with the program. The participants would be employers and Department of Labor personnel, Authorized Employee Representatives and their representatives, including attorneys, who have personally participated in cases from February 15, 2011 through February 14, 2012. The proposed information collection instrument is a written survey consisting of a series of multiple-choice questions that are intended to take a respondent no more than 30 minutes to complete. The respondents may skip any questions that they do not feel comfortable answering, and are permitted to comment further on their experiences at the end of the questionnaire.

OSHRC has submitted the proposed information collection to OMB for review, as required by the PRA. OSHRC invites comments to be submitted to OMB on: (1) Whether the proposed collection of information is necessary for the proper performance of the agency's functions, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.
